PROJECTS

UW Information School - YellowCab Design Concept

2014

iOS App Design Concept for ridesharing cabs via social networks;
produced hi-fi prototypes as final deliverables.

UW IT Learning Technologies - LabTracker User Research

2014

Conducted surveys and user interviews to identify requirements for
an in-house computer issue tracking system.

Facebook Hackathon - iOS Design & Development

2014

Led the UX and UI design in a group of 4 to create an eatery
recommendation app that integrates with social networks.

EXPERIENCE

UW IT Learning Technologies - Network Lead

2013 - Present

Developed scalable and automated OS deployment systems with
DeployStudio.

Analyzed and optimized internal workflows based on surveys and
user research.

UW IT Learning Technologies - System Administrator (Mac)

2012 - 2013

Developed and deployed customized OS X images to 300+
machines.

Developed in-house applications in AppleScript and performed
hardware and software troubleshooting.

EDUCATION

University of Washington, Seattle

Bachelors in Informatics (Human Computer Interaction)
Graduating in Spring 2015
